

# 1. telek - Szeged

Out of town but in the area where ,things are happening' now. On the south-east side residential developments have been started in the past years. To the north-west ELI and BYD development are increasing the value of our spot. Commercial zoning gives opportunity for retail/hotel/office/logistic uses. The mentioned developments will define the best use. Road development by the town has changed the access and gives more opportunity.
